Summary

IT Professional with 15+ years of experience delivering data quality, governance, and integration solutions across banking, insurance, and government. CDMP, PMP, and Informatica-certified specialist in designing enterprise data quality frameworks, implementing Informatica IDQ/CDQ, Axon, and EDC, and establishing data governance operating models aligned to DAMA-DMBOK and local regulations (NDMO/PDPL). Proven track record in reducing critical data defects, improving regulatory reporting quality, and driving data governance adoption with business stakeholders.

Professional Certifications

Data Management & Engineering

- Certified Data Management Professional (CDMP), DAMA International **(2025)**
- Informatica Data Quality 10 Developer, Informatica **(2024)**
- Informatica Cloud Data Quality (CDQ), Informatica **(2025)**
- Informatica Cloud Data Governance & Catalog Foundation, Informatica **(2023)**
- Data Engineering Foundation, Informatica **(2023)**
- Astronomer Certification for Apache Airflow 3 Fundamentals, Astronomer **(2025)**

Project Management & Agile

- Project Management Professional (PMP), Project Management Institute (PMI) **(2026)**
- Agile Certified Professional **(2024)**
- Google Project Management Professional Certificate, Google **(2026)**

Quality assurance & Security

- ISTQB Certified Tester – Foundation Level (CTFL) **(2022)**
- EC-Council Certified Secure Programmer (ECSP), EC-Council **(2021)**

Insurance & Domain Knowledge

- LOMA 280: Principles of Insurance, LOMA **(2013)**
- LOMA 291: Improving the Bottom Line – Insurance Company Operations, LOMA **(2013)**

Skills

Data Management & Governance

- Data quality management
- Data Cleansing / Remediation
- Data governance
- Metadata management & Lineage
- Data Privacy & Data Classification
- Master & reference data management.
- Data warehousing & BI
- Data Modeling
- Data stewardship & data ownership
- Regulatory compliance (PDPL, NDMO)

Project management & Delivery

- Project management – PMP
- Agile/Scrum Methodology
- Requirements and backlog management
- Stakeholder management
- Risk and issue management
- Change management
- KPI and dashboard development

Technical & Tools

- Informatica Data Quality – IDQ
- Informatica IDMC
- Informatica Cloud Data Quality – CDQ
- Data profiling, standardization, and Matching
- Data quality scorecards & KPIs
- Informatica ETL
- Informatica Axon & EDC
- Airflow
- Python, C#
- Oracle, SQL Server database
- SQL, PLSQL, and HiveQL
- Data pipeline Testing & MDM Testing
- Version control (GIT & MS Source Safe)
- MS Power BI
- JIRA
- MS Project
- VISIO
- Requirement gathering and analysis
- Rest API Development, Testing, and Consumption

Business & Leadership

- Lead, mentor, and collaborate with cross-functional teams.
- Insurance, Banking, and ERP

Projects

Riyad Bank, Saudi Arabia – Data Management Tools Implementation (Aug 2024 - Ongoing)

Implemented Informatica-based data management and data quality solutions, including data profiling, rule implementation, and scorecard to support regulatory and analytical reporting.

IMO, Saudi Arabia – Data Management Tools Implementation (Oct 2024- Jul 2025)

Deployed data management tools and configured data quality, metadata, and governance capabilities to improve trust in operational and management data.

NCGR, Saudi Arabia – Data Management Tools & ETL & MDM Testing (Mar 2023- SEP 2023)

Lead testing of data management and MDM platforms, validating data integration, mastering, and quality rules across source, staging, and golden-record layers.
Design and execute ETL and data warehouse test cases, using SQL-based reconciliations to verify source-to-target mappings, transformations, and aggregations.

AXA Insurance, Egypt – Software & Data Testing for Insurance Systems (Aug 2014 - Mar 2023)

Performed functional, integration, and data testing for in-house insurance applications and interfaces with third-party providers, ensuring reliable data flows and system stability.

AXA Insurance, Egypt – Internal Applications Development (Sep 2012- Jul 2014)

Developed and maintained internal .NET applications for insurance operations, supporting policy administration, reporting, and process automation.

B&F SW Services, Egypt – ERP and Point of Sales systems (Sep 2012- Jul 2014)

Developed and maintained internal .NET applications for ERP systems and restaurant POS systems, supporting policy administration, reporting, and process automation.

Experience

Data Management Consultant — **10/2023 to Current**
Jadara Solutions — **Riyadh, Saudi Arabia**

- Lead design and implementation of data management projects using the Informatica platform across 3 enterprise clients, creating 1000+ data quality rules over 8–10 critical data domains and deploying automated monitoring across multiple source systems.
- Develop enterprise data quality scorecards and KPIs in Informatica/Power BI, enabling executives to track 6 key metrics and reducing critical DQ incidents impacting reporting by 40%.
- Collaborate with business and IT stakeholders to align data quality controls with NDMO/PDPL requirements, closing many audit findings and ensuring compliant handling of sensitive data.
- Develop and maintain data quality processes, procedures, and guideline documents to standardize practices across projects and client organizations.
- Support enterprise data governance initiatives by linking data quality controls to critical data elements and compliance obligations, improving trust in regulatory and management reporting.
- Perform data profiling and data quality assessments to identify completeness, accuracy, validity, and consistency issues across source and target datasets, and recommend remediation actions.
- Configure and maintain data quality scorecards, thresholds, and monitoring rules to track trends over time and trigger alerts for material deviations.
- Design and develop Informatica data quality mappings and rules for standardization, validation, parsing, and enrichment in both batch and near real-time integrations.
- Lead data quality defect triage, coordinate fixes with ETL/data engineering teams, and verify corrections through reprofiling and regression testing.
- Build and manage the Business Glossary (domains, subdomains, terms, definitions, synonyms, lifecycle/status) to provide a single source of truth for business definitions.

Data Testing Lead **03/2023 to 09/2023**
NCGR Via Jadara Solutions, Riyadh, Saudi Arabia

- Lead test strategy, planning, and execution for data pipelines and MDM solutions, managing the testing team to deliver against project milestones.
- Validated data accuracy, completeness, consistency, and integrity across source, staging, and target systems by designing reconciliation checks and controls.
- Perform root-cause analysis of data defects and coordinate with development, data engineering, and business teams to drive fixes and re-testing.
- Test end-to-end data warehouse and integration deliveries (data lake, Denodo, SSAS), developing and executing ETL test cases with advanced SQL to verify source-to-target mappings and complex transformations.
- Ensure comprehensive coverage and traceability by reviewing business requirements and technical designs, maintaining test cases, execution evidence, defect logs, and stakeholder status reports, and executing API tests with Postman for data-consumer endpoints.

Quality Assurance Team Lead **01/2017 to 02/2023**
AXA Egypt, Cairo, Egypt

- Lead the Quality Control team, managing day-to-day activities, resource planning, and coaching to maintain a high-performing, motivated workforce.
- Define and implement test strategies and detailed test plans, covering objectives, scope, levels, techniques, and environments for complex insurance applications.
- Conduct risk assessments, impact analysis, and defect triage meetings to prioritize testing efforts and ensure timely resolution of critical issues.
- Oversee and execute system, integration, API, database, and UAT testing to confirm solutions met functional and quality requirements.
- Reporting test status, progress, and quality metrics to project managers and senior management, and drove continuous improvement of testing processes to increase efficiency and product quality.

Senior Quality Assurance Engineer **08/2014 to 12/2016**
AXA Egypt, Cairo, Egypt

- Estimate, prioritize, plan, and coordinate testing activities across multiple releases and platforms.
- Design and execute test cases and scripts in test management tools, covering web, desktop, and API environments.
- Provide clear feedback to development teams and effectively communicate defects and risks to both technical and non-technical stakeholders.
- Prepare and present test reports summarizing coverage, results, and outstanding issues.
- Collaborate daily with developers to clarify business requirements and logic, ensuring accurate understanding and implementation.

Senior .Net Developer **09/2012 to 07/2014**
AXA Egypt, Cairo, Egypt

- Develop, test, debug, and maintain .Net applications for insurance products
- Collaborate with cross-functional teams to identify areas of improvement and implement changes
- Write clean, scalable, and documented code that meets industry standards
- Troubleshoot and fix bugs and issues that arise during the development process

.NET Developer **01/2010 to 08/2012**
B&F SW Services, Cairo, Egypt

- Develop, test, debug, and maintain .Net applications
- Gather and analyze user requirements to design and implement efficient software solutions
- Collaborate with cross-functional teams to identify areas of improvement and implement changes
- Write clean, scalable, and documented code that meets industry standards

Education

Bachelor of Computer Science **01/2008**
Faculty of Computers and Information, Zagazig University
